

Sutton Energy Committee

Meeting Minutes

January 21, 2020

Attendance: Martha Tack, Mary Waldron, and Darlene Ahrens
The meeting was called to order at 6:20 PM

The minutes for the November 19, 2019 were read and approved with typographical errors corrected.

Energy Fair

Martha reported her work on the fair so far. We agreed to change the date from March 21 because that is also Maple Weekend and we felt it best not to compete with that event. Martha is going to see if the All Purpose Room would be available for March 28.

The current plan is to partner with someone who could do a pancake breakfast as a fundraiser.
Hours 8:30 – 1.

Maple syrup donations?

Have tables in the room with information from various groups about what is available.
See if the school children could be involved in some way, perhaps show their science projects etc.
We also discussed how to get the word out and have developed a work plan

Window Dressers

Mary, Gwen and Darlene attended Window Dressers workshops in Montpelier. There is no work to be done at present except prepare for Town Meeting and get the word out to town people. Also, we may want to recruit people who would be interested in working on this project. Celeste Girrell has agreed to work on this project and she is contacting another person who she thinks may want to join in. Things should start to happen in this program in the late spring.

Town Report

Darlene mailed out a copy of the report submitted for the Town Report

Town Energy Plan

We reviewed the Energy Plan which is designed to make us eligible for consideration in the siting of industrial energy generation. One of the biggest areas for the Energy Committee is getting information to Sutton residents about what resources are available to help with weatherization.

The next meeting will be February 18, 2020

The meeting was adjourned at 7:45
Respectfully submitted
Darlene Ahrens
